Inputs and valuation

Reference documents

Manufacturing

Reception, acceptance, drying

Stocks

Delivery, invoicing

Our promise ?

To support you in the digitalisation of your production processes

Our consultants will study your digital project: from configuration to training in how to use the tool.

Agreo Seeds software is customisable and therefore designed to meet your specific production requirements.

The User Club gives you the opportunity to collaborate towards the improvement and development of your tool.

EXPLORE THE POWER OF AGRICULTURAL BIG DATA ●

Whatever your profession, wherever you are based in France or in the world...
Agreo Seeds ensures optimal visibility of your technical data at every stage of production.

MULTI-FUNCTIONAL

Through precise management of users' rights, our ERP can be adapted to your operational teams' activities and workflow, from production manager to field technician or quality and invoicing managers.

MULTI-FORMAT

In the Mobile First era, our software packages are suited to different environments and your teams' work constraints. (PC and mobile formats)

GLOBAL

A multilingual Cloud solution, you can access your data in real time from production sites in France or anywhere in the world.

AGREO SEEDS[®]

Your new-generation collaborative ERP system

COMMITTED TO WORKING FOR PROGRESS

Increase agility and enhance processes with agreeo Seeds

● SEMENCES DE FRANCE

Pascal Mombled - *CEO*

Agreo Seeds software streamlines internal interaction between technical and administrative teams. Its accessible, easy-to-use interface ensures optimum security in the consolidation of your technical and invoicing data, even for complex management settings ! Our invoicing process has been significantly streamlined it now takes 3 days instead of 3 weeks ! This is a major time saving.

● TOP SEMENCE

Denis Delay - *Head of Corn, Sorghum and Sweetcorn production*

When we started using this solution 10 years ago, our objectives were to bolster and maintain the quality of our field monitoring operations, as well as the management of seed multiplication contracts. The tool's powerful cartographical functionality allows us to precisely identify production plots.

● AXERREAL

Patrick Lhermitte - *Head of Management and Subcontracting / Seed Unit Management*

Having a centralised ERP provides us with an instant panoramic view of what's going on across our 5 production sites. We've made gains in standardising procedures, from the production plan through to marketing, and in all phases of the seed transformation process.
