- Benefit from stock projections ready-for-Sales

BILLING

- Design your sales catalogues
- Bill your sales with reductions, add-ons and options
- Edit your bills with the calculation engine

OPTISEEDS

An offer for Seed breeders

Thanks to OptiSeeds, Seed breeders have an agreo platform enabling them to collect, centralize and analyze on several campaigns the production delegated to various seed grower companies.

Thus, production follow-up information (planting, flowering, harvesting,...) is entered and visible in agreo of the companies that the seed breeder works with.

For companies that are not equipped with agreo, a light agreo offer allows them to transmit the data required by the seed breeder.
